SUMMARY

As a Web Developer specializing in frontend development, I excel in creating user-friendly websites and web applications using modern libraries such as React and Next JS. Continually learning and adapting to new trends and best practices, I am committed to enhancing my skills. As a junior developer, I am eager to gain hands-on experience and learn from industry experts

SKILLS

Javascript, Next JS, React JS, Tailwind, Bootstrap, Typescript, Zustand, Node JS

EDUCATION

BSc Computer Science: 2023 – Till Date

EXPERIENCE

June 2023 - Present

Freelance Web Developer

- Engaged in volunteer roles in community events and also contributing in an open source project.
- Worked on a contract project for a company that is looking to build a web app that allows users to select and browse ideas on how to style suits for different events and occasions
- Developed a landing page for a gym app.
- Co-founded a startup that focuses on making ferry rentals easier for people.

June 2023 – February 2024

SM TECH- Web Developer

- Developed landing pages and frontend web applications, contributing to client satisfaction.
- Collaborated with a development team, enhancing productivity and reducing development cycle time for new features by 30%

June 2024- December 2024

Makkan Innovation - Web Developer Intern

- Developed landing pages and dashboards that are user friendly and allow easy access through a blog web app.
- Developed an E-Commerce web application for a client.
- I was part of the team that built the company's product which is a real estate lsiting web application.

HNG Internship- Frontend

- I participated in the HNG internship and I competed up to stage two. During this period,worked directly with a designer and I brought the designers E-Commerce design into life as part of tasks assigned by mentors.

January 2025 - Till Date

FlologPharma - Web Developer

- Currently working as a web developer for FlologPharma. A Pharmaceutical company that focuses on making consultations easier for patients. By providing a platform that allows for easier access to Pharmacists, get stress free consultations as well as easier and better drug dispensation.

Also, I am currently co-founding a startup in the EdTech space whose aim is to make online learning easier by providing a platform that provides a better way of attending virtual and physical classes.

Other Skills

- **Communication:** I have the ability to clearly express myself, convey ideas and listen to objective criticisms effectively and these abilities were developed by networking with people and teaching people who are just getting into Tech.

- **Team Work:** I learnt how to collaborate and work efficiently as a member of a team by joining communities, working in public, sharing Ideas and asking for help when needed.

- **Problem-Solving:** Being able to provide solution to technical issues by thinking critically and being innovative.

- **Time-Management:** Completion of tasks or projects in a short period of time. I was able to develop this by ensuring I meet up with deadlines and submitting tasks on time.
